

MALDIVES RESILIENT REEFS RECOMMENDED NO-TAKE SPECIES

Although these species are not illegal to catch, we recommend not catching them to maintain their populations at healthy levels.

KEY

Listed as 'Vulnerable'
on the IUCN Red List of
Threatened Species

Populations declining

Globally data deficient so
their population status is
not fully understood

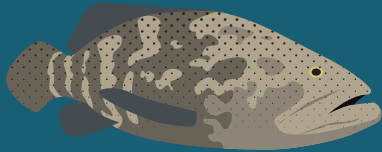

Slow-growing and
long-lived so are
easily over-exploited

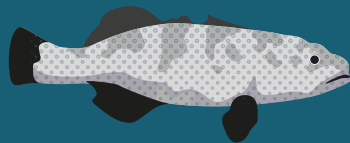

Important ecological
role

**Giant
grouper**

**Squaretail
coral grouper**

**Camouflage
grouper**

**Brown-marbled
grouper**

**Deep sea species such
as Ruby snapper**

**Indo-Pacific
blue marlin**

**Surgeonfish
(all species)**
